

CLAIM AMENDMENTS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) An opening and closing ~~opening/closing~~ structure for a tray of an automobile comprising:

a main body for storage ~~that stores various kinds of small items and~~ having a through-hole at its lower end;

a door that opens and closes ~~opens/closes~~ by rotating upward a front surface of the main body ~~by using a rotary device~~, and provided with a hooking hole conforming to a position of the through-hole;

a button part installed at the lower end of the main body; and

a fixing hook part installed at an inner part of the button part, and inserted in and released from ~~or released in/from~~ the hooking hole through the through-hole depending on a snap operation of the button part.

2. (Currently Amended) The opening and closing ~~opening/closing~~ structure according to claim 1, wherein the button part comprises:

a fixing plate mounted on a lower end of the main body and having a button hole formed at its front surface;

a button partially inserted into the button hole; and

a button spring mounted on a rear surface of the button and having a recovery force when the button is operated.

3. (Currently Amended) The opening and closing ~~opening/closing~~ structure according to claim 4 2, wherein the fixing hook part, installed in the fixing plate, comprises:

- a protrusion inserted into the hooking hole through the through-hole;
- a protruding plate extended from the protrusion and spaced apart from the rear surface of the button;
- a fixing spring mounted on a lower end of the protruding plate; and
- an inclined plate installed at the protruding plate and having an inclined surface that moves the fixing hook downward when the button is pressed.
